You can use either the Dash Mount or the Vent Mount for your Sportster 5, depending upon your vehicle and orientation is correct, tighten the knob.

Connect Vehicle Dock.

Locate a flat surface for the Dash Mount. (Options 1, 2, or 3.)

Install the Dash or Vent Mount installed.

Connect the Audio to Your Vehicle's Stereo.

Clean the surface with the alcohol preparation pad and tail firmly into place on the vehicle for 30 seconds to adhere it. Loosen if necessary,

Connect Power Adapter into your vehicle's cigarette lighter or power adapter connector on the left side of the dock.

Finish the Installation and Power On.

Press the green AUDIO button to turn it On.

Connect Vehicle Dock. Insert Connect (continued)

Move the Dashboard Mount to the top of the dash, or mount it on a vent in your vehicle. 

Install the Magnetic Mount Antenna.

Mount the Magnetic Mount Antenna. 

Connect the Power Adapter.

Insert your Sportster 5 into the dock, aligning the radio against the rear of the roof such as a roof rack or c FM Transmitter.

Tune your Vehicle's FM Radio and the Sportster 5 to the same FM channel.

Select button.

Select button. 

Press the Control knob and press the Control knob until the menu options are displayed.

Turn on your vehicle's FM radio (if you have not already done so) and tune it to this FM channel. 

You should hear SIRIUS through your vehicle's radio when Sportster 5 is selected will be confirmed on the display screen.

The Sportster 5 will tune to the FM channel.

The FM channel you selected will be confirmed on the display screen.

SIRIUS signal. Ensure your vehicle is outside with the antenna having a clear view of the sky. 

Your audio connection options are:

• Best:

  - Wire the antenna directly into the vehicle stereo system's auxiliary input jack.
  - The green AUDIO light should be lit.

  - Set the stereo system to play from the auxiliary input source.

  - Your vehicle's FM radio.

• Alternative 1: 

  - The green AUDIO light will be lit.

  - Feed the antenna wire under the rubber molding around the front or rear windshield, and into the seal around the trunk or door. For a convertible, the antenna wire will be fed out through the roof seal. 

• Alternative 2: 

  - The green AUDIO light may not be lit.

  - Bring the cable out of the weather stripping and route it under the carpet toward the trim. Bring the cable out from the trim and route it under the carpet toward the trim. Bring the cable out from the trim and route it under the carpet toward the trim. Bring the cable out from the trim and route it under the carpet toward the trim.

  - Hide the Magnetic Mount Antenna Cable Inside the Vehicle.

Feed the antenna wire under the rubber molding around the front or rear windshield, and into the seal around the trunk or door. For a convertible, the antenna wire will be fed out through the roof seal. 

When the antenna is mounted at the rear of the vehicle, it's usually easiest to run the cable into the trunk, and then route it under the carpet toward the trim. Bring the cable out from the trim and route it under the carpet toward the trim. Bring the cable out from the trim and route it under the carpet toward the trim.

For more help, refer to the detailed antenna cable placement tips and cautions in the User Guide beginning on page 23.
