Find a Location for Onyx EZ and Mount it

Select either the Dash Mount method or the Vent Mount method for your Onyx EZ. You will need a Phillips-head screwdriver to complete the installation.

Dash Mount Method:

1. Choose your installation location to be at least 60°F to install the Dash Mount. In most cars, the ideal choice for a particular dash may be different from the other side of the vehicle.
2. Select a flat surface for the Dash Mount, vehicle side for Onyx EZ. Mounting on a window is not recommended. If you have a location on the dash where the cables can be connected to your vehicle’s cigarette lighter or power adapter socket, this is often preferred. If the mounting location is not in the vehicle’s cigarette lighter or power adapter socket, skip ahead and finish the remainder of the vehicle installation so that the cables are accessible to the user.
3. Orient the adhesive foot so that Onyx EZ is easily accessible. Loosen the knob and adjust the extended vent clamps.
4. Connect Vehicle Dock using the 4-foot cable. Before you attach the Dash Mount to the dash, skip ahead and finish the remainder of the vehicle installation so that the cables are accessible to the user.

Vent Mount Method:

1. Choose the location for the antenna according to your type of vehicle. Center it between the inside door trim and the other side of the vehicle and where it will not interfere with the deployment of airbags or other safety equipment, and makes Onyx EZ easily accessible for operation. (Airbag locations are typically marked with “SRS” logos.)
2. Select a flat surface for the Dash Mount with ample room for Onyx EZ. Avoid mounting on leather (leading edge of trunk) or carpet. (above front windshield or rear window)
3. Slide the vent mount into the vent opening. (To install the extended vent clamps."

Mount the Magnetic Mount Antenna

1. Mount the Magnetic Mount Antenna outside your vehicle, on a clean and dry horizontal surface (above front windshield or rear window.)
2. Route the antenna cable out of the vehicle and into the rubber guides around the door opening. Tuck and run the cable inside it to the bottom of the door. Include enough slack in your routing to accommodate open doors or the hood latch. Coil any excess cable in a hidden location and keep it away from any vehicle pedals or controls.

Connect the PowerConnect Power Adapter

1. Insert the PowerConnect Power Adapter into your vehicle’s cigarette lighter or power adapter socket. The silver end and the red/white connector at the rear of the PowerConnect Power Adapter.

Verify Signal Reception

1. You can also press the menu button on the front of the Remote Control to verify signal reception. Press the Select button and then press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to view the signal reception. Use the Extend button to change the level of the signal strength. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to control the volume using the signal strength. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to increase the audio level. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to decrease the audio level. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to switch to another channel. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to activate the signal strength.

2. Lift the weather stripping. Pull the cable out and route it to Onyx EZ. Replace the weather stripping. Connect Vehicle Dock using the 4-foot cable. Before you attach the Dash Mount to the dash, skip ahead and finish the remainder of the vehicle installation so that the cables are accessible to the user.

3. Use the Extend button on the back of the dock to increase the volume or decrease the volume. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to change the level of the signal strength. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to control the volume using the signal strength. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to increase the audio level. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to decrease the audio level. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to switch to another channel. Press the down arrow to scroll to and highlight Signal Indicator. Press the Select button to activate the signal strength.

4. Place Onyx EZ into the dock and press the Power button.
QUICK START GUIDE

Option 1: Best: the FM Direct Adapter (FMDA) (both sold separately). Go to www.siriusxm.com/fmchannel to select the FM channel.

You may find an FM channel with static or silence on your vehicle’s FM radio that does not work with your product. To change the FM channel:

A. Press and hold to access the FM channel selection menu.
B. Press to scroll to and highlight FM1, FM2, or FM3.
C. Press to return to the main display screen.

It’s recommended to refer to your vehicle’s owner’s manual to find the location of the auxiliary input jack, or consult the vehicle manufacturer’s website or call the vehicle manufacturer for assistance with the following:

- Power: Plug one end of the cable into the Audio Connector: 1/8 in (3.5 mm) stereo male and connect the other end to the AUX connector at the rear of the vehicle.
- Connect Vehicle Dock which came with your Onyx EZ, you will have to disable the Auto-Activate feature. Leave the dock connected to the vehicle and do not activate until you complete the subscription process.

When listening to a channel, you can:
